Objective

Enthusiastic about the combination of Business and IT with drive to innovation. Always excited for new opportunities and challenges to further develop myself.

Experience

03/2019 – 01/2023

Salesman & Chief of IT • De Ambachtelijke Dorpsslagerij (Butchery)

07/2021 – 08/2021

Teaching Assistant • Van Berkum

11/2022 – current

Software developer • eMagiz

Communication

At the Ambachtelijke Dorpsslagerij, I work with numerous clients each day where it is my job to advise, persuade, aid, and solve complaints. This has improved my communication towards clients as well as co-workers. Further, organized and participated in multiple Modelling United Nations (MUNs) along with two speaking contests.

Leadership

Former chairman of the student council as well as personally led a team of developers for the “Utrecht Time Machine” programme at the University of Utrecht. I lead a team of salesman at the Ambachtelijke Dorpsslagerij as well as handle all the IT operations which require delegating when needed. I feel responsible when leading a team assigning members tasks based on their strengths or to help strengthen their weaknesses.

Coding

Started coding at around 14. Most advanced in Python with intermediate in fields such as data science and Django Further comfortable with Java, SQL, React and basic front-end languages such as HTML, CSS. For my current job, I develop with the Mendix platform.
